

Care Plan Adherence

Are you wasting too much time reviewing documentation for accuracy, contacting caregivers for missing documentation, and performing data entry?

The road to care plan adherence starts here.

Efficient

Reduce time spent reviewing documentation, collecting missed documentation, and entering data manually.

Intuitive

Caregivers using telephony will hear a real human voice prompting them to document specific items that have been ordered. Mobile web app users have a visual care plan road map.

Compliant

Ensure that orders are documented accurately, and track compliance for the patient on each visit.

Customizable

You decide which items are collected on a visit and how.
